

# Westchester Park Pediatrics

Affiliated with Boston Children's Health Physicians

Congratulations on the birth of your new baby and welcome to Westchester Park Pediatrics. We pledge to provide the highest level of care for your newborn and are anxious to watch them grow up into toddlers, children and adults before our eyes.

We are a group practice at Westchester Park Pediatrics and through the upcoming years, you will certainly have a change to meet with all of the physicians. Most of the patients, for continuity sake, do affiliate with one specific physician in the group to care for all the scheduled visits for your child. That way, the physicians do establish a truly personal relationship with you and your child, and have a firm knowledge of problems or medical conditions that may arise. However, there may be times that your specific physician may be unavailable to see your child. Particularly, for sick visits (or "same day visits"), your physician may not be readily available and therefore you will be encouraged to see one of the other physicians. Be assured that the physicians do communicate amongst themselves, so that your specific physician will always be aware of any medical conditions that were tended to by another one of the physician.

Your baby will be scheduled for medical check-ups according to the guidelines of the American Academy of Pediatrics. This means that your baby will be seen within the first week of life, then at one month, two months, four months, six months, nine months, and then at one year of age. If you have a medical plan that allows "unlimited check-ups", you will be entitled for your baby to receive a check-up monthly in the first six months of life. It is your obligation to verify with you insurance carrier that you might have the "unlimited check-up" plan. Otherwise, your baby will be seen according to the schedule endorsed by the American Academy of Pediatrics. The doctors will discuss all of the vaccinations with you at each visit. If for personal reason, you are uncomfortable receiving the vaccinations according to the American Academy of Pediatric guidelines, then you will be allowed to come for visits in between your scheduled check-ups. Please be aware that if you desire to do so, these visits will require a co-pay. In the event that your insurance carrier denies payment for these visits to Westchester Park Pediatrics because they fall outside the American Academy of Pediatric guidelines, you will be responsible for that payment.

It is imperative that after your baby is born, you immediately call your human resources counselor or your insurance carrier to get your baby added to your plan. Most insurance companies allow thirty (30) days to add your baby to the plan. If you neglect to do this and your baby is not added to your plan by thirty days, you will again be responsible for payment for visits to Westchester Park Pediatrics.

Please sign below to acknowledge that you have read the above and understand your responsibilities.
